

Sound Team Risk Assessment

Assessors: Alex Monaghan (team leader)

Site: Queen Mary Centre

Date: May 2025

Review Date: May 2026

Significant Hazards	Who Might be Harmed and How	Existing Control Measures	Further Control Measures
Electricity		<ul style="list-style-type: none"> See General Risk Assessment. 	<ul style="list-style-type: none"> General good practise suggests not daisy chaining extension leads, however, where multiple low voltage adaptors (usually used for effects pedals or small electric instruments or laptops) are required, it would be acceptable to daisy chain multiple extension leads. If unsure seek advice. Desk ideally to be on separate circuit to instruments to minimise risk of overload. On introduction of new or loan equipment, ensure total load does not exceed ratings.
Fire		<ul style="list-style-type: none"> See General Risk Assessment. 	<ul style="list-style-type: none">
Manual Handling		<ul style="list-style-type: none"> See General Risk Assessment. 	<ul style="list-style-type: none">
Slips/Trips		<ul style="list-style-type: none"> See General Risk Assessment. 	<ul style="list-style-type: none">
Sound Levels		<ul style="list-style-type: none"> See General Risk Assessment . Feedback should be avoided where it is in the control of the operator and minimised as quickly as possible. 	<ul style="list-style-type: none">
